

*“The way we understand ourselves and our world is always evolving.  
From instinct to intuition to intellect, part of being human is  
using multiple ways to gather and utilize information.”*

—INSTITUTE OF NOETIC SCIENCES, DEAN RADIN PHD

## The New Genius Workshop

“JOURNEY INTO INTUITIVE INTELLIGENCE”

*Dean Radin, PhD, chief scientist at the Institute of Noetic Sciences (IONS), defines Intuition as:  
“Knowing without knowing how you know.”*

“Knowing without knowing how you know,” is a perfect way to describe the aspect of our innate qualities that have “knowing,” which is the intuitive dimension of our human design.

What if we were able to access Intuitive Intelligence intentionally? How would that affect our professional and personal lives? How efficient would we become when making decisions from an intuitive perspective? Imagine consistently managing our businesses to successful outcomes through “leading by sensing the future.” Is this possible? Global studies say YES!

An intuitive option may sound unusual in a business education course, and one may wonder what this has to do with the business world and conducting business.

The chaos surrounding global societies has much to do with the speed that things are moving and changing. Our familiar practices of evaluating what to do and which direction to take, from our minds only, soon will no longer be a viable option. The changes appear to be moving at the speed of light.

Strong evidence exists that we are effecting our outcomes, moment to moment. Intuitive Intelligence is a high state of consciousness. Accessing Intuitive Intelligence is becoming a new normal for decision-making and creating in a manner relevant to the future. Intuitive Intelligence is where the great minds resided in their era and changed life as we know it today on planet Earth.

*Now it's our turn!*
