

VALUE vs. FORCE™

a new way to *be* in business

The Power of Commitment

Definition of Commitment:

“The state or quality of being dedicated to a cause, activity; a promise, a vow, determination.”

The Power of Commitment is a subject that is rarely understood and rarely explained or taught. In courses dealing with maximizing potential and peak performances, commitment is brought up as a factor to success and then guided to “go home get one of these. This matters.”

Professionals across the spectrum of industries would without fail accomplish what they set out to accomplish when they understand and adopt The Power of Commitment. Commitment isn't merely a factor to success. Commitment is the reason we succeed! Commitment = Results!

When companies or individuals are not happy with the results they are experiencing, the guidance (or insistence) is to “step up the efforts to change your results.” Moving faster and more isn't the solution to the unsatisfactory results. The issue is the lack of commitment not the volume of effort. An understanding of this difference will make all the difference.

The Power of Commitment teaches what a commitment is, what it does, how to activate a commitment and how to apply your renewed commitment to the growth of your life and business. A simple shift creates huge results!

“Commitment manifests our potential, creativity, genius and is directly responsible for our results; not our effort.”
