

# VALUE vs. FORCE™

a new way to *be* in business

## The Power of Courage

### Definition of Courage:

*"... brave; valor; to defy. Courage is an inherent quality which exists inside of someone or something as a natural and inseparable quality. Courage is a right."*

Value vs. Force Educational Series™ continues to address the dynamics present when being effective and productive in business arenas when prosperity and success unfold. We are passionate to bring to the business communities clarity of what taking place when producing desired and successful outcomes.

Much to everyone's surprise when they hear of these dynamics, most people inherently know at some level this is all incredibly familiar! The key is applying what we already know!

We have created an educational series which focuses on specific individual subjects called The Power Series™ that will give energy and enthusiasm to those interested in successful attitudes, actions and outcomes!

The Power of Courage in our series, teaches what courage is and how to produce a surge of power of such magnitude your win will be eminent. Courage is a choice to act. Courage has the power to activate our deeper potential; which behavioral scientists have said for decades is a dominate driving force in all human beings.

*"The surge of power that erupts inside of us to face the situation or persons, establishes a new normal of confidence; when you need courage, it will be there!"*
