

# VALUE vs. FORCE™

a new way to *be* in business

## The Power of Momentum

### Definition of Momentum:

*“Impetus; the force with which a body moves against resistance, a stimulus to action; incentive.”*

Commission driven occupations are filled with generous, dedicated and courageous people risking everything and banking on themselves to be successful in business and in life.

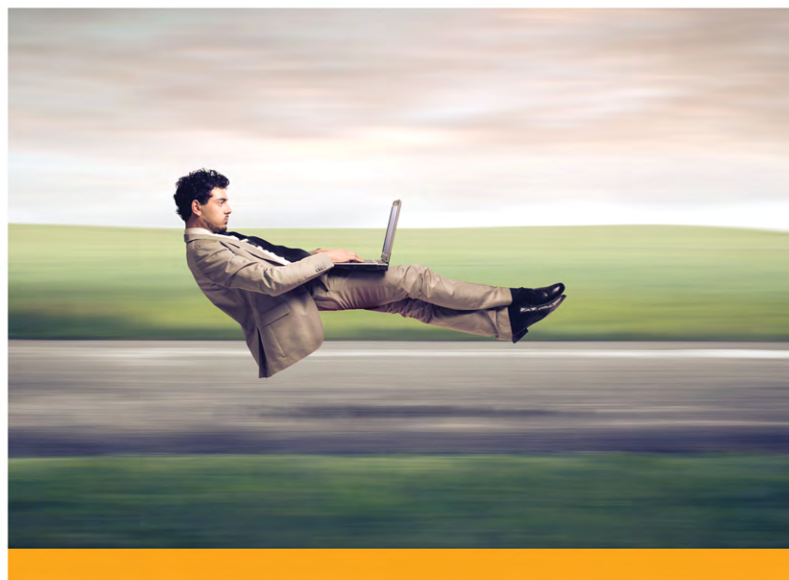

Value vs. Force Educational Programs are all designed to support successful outcomes for those like you on the leading edge of business. It is our full intention and commitment to empower those leading the charge creating opportunity for so many and most deserving of winning.

One of the aspects to successful outcomes and sustainability is MOMENTUM. Momentum is likened to a stone traveling downhill, in motion gathering much along the way and moving faster and getting bigger with little effort. This is such a crucial subject; in fact, one of the most significant aspects to a continued string of successes is the sustainable practice of The Power of Momentum.

The Power of Momentum Program powerfully impacts the way to approach securing new business and launching a momentum to maintain value to your new and existing clientele base.

*“Maintaining a Momentum - Sustains a Momentum. Continued access to those we choose to work with is key to sustainable business building dynamics.”*
