

VALUE vs. FORCE™

a new way to *be* in business

The Power of Self-Determination

Definition of Self-Determination:

*Determination according to one's own mind;
free will; right to choose; firm intention; firmness of purpose.*

The Power Series™ shares a foundational intention; to be of highest value to the empowerment of everyone who attends our classes. An empowered life condition and attitude originates from choice. The choice to activate Self-Determination raises the intensity of the intentions and the commitment for improvement.

We choose professions that enable us to grow and gain throughout our lives. Abraham Maslow, Behavioral Scientist, studied "Hierarchy of Needs" which are the levels a human being travels through internally that lead to a condition entitled "Self-Actualization" which means, "self fully realized." We are hard wired to hunger for a full recognition of our highest self! Self-Determination leads to the fulfillment of this journey.

In most career paths, we, at times feel we do not have choice. The Power of Self Determination reveals how to open broader perspectives that transform the majority of interactions with others from a place of choice; rather than a place of obedience. A powerful influential life will bring forth deep potentials out in the open craving to be spent and in those interactions, everyone wins!

"Self-Determination to manifest our potential is at the heart of our confidence, our empowerment and most of all, our well-being!"
