

VALUE vs. FORCE™

a new way to *be* in business

The Power of Communication

Definition of Communication:

“The imparting or exchanging of information by speaking, writing or using some other medium.”

*Success in business and life is all about relationships.
Communication is the key link to building every relationship.*

It is incumbent on us all to consider the quality of our communication. We communicate verbally and non-verbally with others. What is the quality of our communication with the concept of “fake it until you make it?” What is the quality of our self-talk?

The Power of Communication explains numerous possibilities of “plugging in” to others as we build a connection and a relationship. On what level are we connecting when we are communicating with others? Social? The quality of our connection in a business setting matters!

Communication is a skill that can be learned. Communication begins with an awareness of our attitudes, intentions and objectives and how these attitudes communicate clearly at all times. This event teaches how to master communication!

Be amazed how communication improves the quality of our relationships and leads to a profound and dramatically improved income!

“Communication is The Voice of our beliefs and our current state of alignment with our attitudes and actions.”
