

# VALUE vs. FORCE™

a new way to *be* in business

## The Power of the Gap

### Definition of the Gap:

*“A gap can be the physical space between two objects, such as the gap between two runners; or it can be a space in time, such as the gap between setting and realizing a goal.”*

One of the questions most asked after The Power of Intention class and The Power of Goal Receiving class is, “Once the intention is launched or the goal is established, what do you do in the meantime until it arrives?” This question may be the most important of all as it addresses the central issue of how manifestation works.

The Power of the Gap reveals what is happening in the meantime and shares the secret of what causes events to move faster and more in sync with what was originally intended.

Mainstream business education doesn’t address the most significant aspect of “building something coming from nothing but an idea and goal;” which is the time period in the Gap. Our nature tends to feel confidence and trust when we can see what’s real. The Gap is about the “reality of the unseen” and how our own influences are determining outcomes.

*“The Gap is a Sacred Space where what we think, feel and do gives birth to a new reality; which then becomes a new reality for all those who come after us.”*
